# Sola Keypad electronic lock

Description:

Sola Keypad electronic lock allows safe and easy storage of items. To open the door, simply press the icon of key, enter the four-digit code (or insert the user key), then move the handle to open the door. Versatility, ease of use, solid metal construction, long battery life, anti-breaking system and a 5-year warranty are the features of the product that you can trust.

Characteristics:

➢ Operating via keyboard or user key.
➢ Models available in vertical, horizontal, left-hand and right-hand configuration.
➢ Surface mount for easy lock or baterry replacement.
➢ Brushed nickel housing for a versatile and modern design.
➢ The lock can work in two modes:
   * public - several users can be assigned to one lock,
   * private - one user has access to only one lock.
➢ Visual and audible indicators for easy operating.
➢ IP55 rated rated for moisture and dust protection.
➢ Easy configuration with a special programming key. Takes approximately 1 minute.
➢ After entering incorrect code several times, the lock goes into sleep mode for one minute. This prevents code breaking.
➢ The master key can be programmed to open all locks in case of forgotten code or lost a key.
➢ Powered by 2 CR2450 batteries, estimated battery life: 180,000 cycles.
➢ Manufacturer's warranty up to 5 years.

Measurement:

➢ height: 133 mm
➢ width: 32 mm
➢ depth: 13 mm (front)
